

# Digital ecosystem FTCoin – investment and trading of tomorrow. Digital currencies blockchain and smart contracts

Digital ecosystem FTCoin is a digital project based on blockchain technologies aimed to create a decentralized investment and trading system. It ensures stable investment income by distributed and automatized trading, based on leading trading systems and optimal portfolio of digital and fiat currencies, shares and other trading instruments.

## Smart Contracts

Smart contract is an algorithm, realized by blockchain platform methods which describes the relationships of the parties and follows the execution of terms of the contract without any mediators. All events, described in smart contract occur automatically, excluding human factor.

Digital ecosystem FTCoin is managed by smart contracts, created on blockchain platform Ethereum which automatically allows for owners of tokens FTT and crypto-currency FT carrying out the following actions:

- Protect your crypto capitals from sharp price changes at swiftly emerging market of digital currencies.
- Build an optimal investment portfolio including high-yielding, but volatile digital crypto currencies and stable fiat currencies, shares and other trading instruments.
- Make instantaneous short-term and long-term investment from anywhere in the world;
- Have guaranteed and stable income during all terms of investment.
- Exchange, buy and sell tokens FTT and crypto-currency FT, secured by confirmed yield of more than 12%.

## Two stages of emission, ICO and project development

1. Emission and ICO of tokens FT token (FTT);
2. Emission and ICO of crypto-currency FT Coin (FT).

### Emission and ICO of tokens FT token (FTT). 1<sup>st</sup> stage

During the first stage funds are raised in order to create and launch decentralized ecosystem of investment and trading and for creation of appropriate technologies. This is achieved by creation and emission through ICO of investment tokens FT token (FTT).

Tokens FTT will be distributed in proportion to sums, submitted by investors during the ICO.

At the end of the first stage tokens FT token (FTT) ensure yield of not less than 12% of distributed at the end of the fiscal year profit for investors. This profit is the result of investment

and functioning of the system and it is distributed in proportion to the amount of tokens submitted by investors. So investors should expect yield of 12% of the amount of tokens FTT investment.

During the first stage profit is transferred to specialized Ethereum Wallets (ETH). Than ETH are distributed among holders of tokens according to smart contracts FT.

### **Structure of Initial Offering of tokens FTT**

- Value of 1 token - 10\$
- Total amount of tokens 5 000 000

### **Distribution of tokens FTT:**

- Among investors – 93%;
- Among founders – 6%;
- Rewards – 1%.

### **Bonuses:**

- PreSale – +10% of bonus tokens;
- 1<sup>st</sup> day – +5% of bonus tokens;
- 2<sup>nd</sup>-7<sup>th</sup> days – +4% of bonus tokens;
- 2<sup>nd</sup> week – +3% of bonus tokens;
- 3<sup>rd</sup> week – +2% of bonus tokens;
- 4<sup>th</sup> week – +1% of bonus tokens;
- 5<sup>th</sup> week – 0% of bonus tokens.

According to the results of initial offering all sold tokens are set as 93% of its total amount. The rest 7% of tokens are distributed among founders and as a reward in conformity with the scheme, described above.

### **Period of Initial offering**

Initial offering ICO of tokens FTT begins on the September, 10, 2017 and continues till the November, 10, 2017.

### **Warranties and obligations**

Ecosystem FTCoin has a unique Proof-of-FT protocol which will give an opportunity to prove statistically significant the security of tokens FTT by the results of current activity yield of not less than 12%.

### **Current state of the project**

Current functioning project of the system FTCoin ensures at the moment average yield equals to \$243299 on investment equals to \$1 178 538 for the period less than 500 days. This yield is confirmed by Proof-of-FT protocol and independent ratings. It gives more than 15% of annual profit. Trading is carried out by group of 25 traders on Alfa-Forex broker (<https://alfaforex.com>) The Alfa Capital Holdings (Cyprus) Limited Company. Its activity authorized and regulated by the Cyprus Securities and Exchange Commission CySEC, ([www.cysec.gov.cy](http://www.cysec.gov.cy)), licence no: CIF025/04, registration no. HE 78416. The main advantage of the project is Trading System of Kasparov P.G. It was elaborated by the leader of the project and the chief of The Financial

Technologies Company Pavel Kasparov. Trading System of Kasparov P.G. provides a single methodological, technological, practical approach to organization and trading in currency pairs and other financial instruments.

### **Distribution of funds**

ICO fund-raising will be allocated for:

1. 90% of funds will be allocated for investment in active business process of the system for immediately fulfillment of the obligation to ensure declared yield of not less than 12% in USD for the whole 100% of tokens FTT bought by investors.
2. 10% of funds will be allocated for:
  - Working out an architectonic, technical and technological solutions of ecosystem
  - Working out a decentralized trading system based on Trading System of Kasparov P.G.
    - Inclusion of digital currencies
    - Extension the list of fiat currencies
    - Maintenance of work in the stock market
    - Inclusion of shares and other trading instruments
    - Form an optimal investment portfolio compiled of trading instruments for working in over-the-counter and exchange markets
  - Working out the smart contracts and software solutions of ecosystem
  - Launching a school, training, team building
  - Organizational, legal, financial issues
  - Security issues
  - Operational activity for purposes of attracting investment, searching and cooperation with business-partners
  - Marketing and PR of the project

Owners of the tokens FTT may rely on profit earned as a result of investment and activity of created system with yield of not less than 12% in USD for the whole 100% bought tokens FTT.

### **Emission and ICO of crypto-currency FT Coin (FT). The 2<sup>nd</sup> stage**

Crypto-currency FT Coin (FT) is issued by ICO during the 2<sup>nd</sup> stage previously secured by confirmed yield at the 1<sup>st</sup> stage.

Funds are raised for further development and scaling of the decentralized ecosystem of investment and trading FTCoin and for creation of appropriate technologies. It is achieved by creation and emission through ICO of crypto-currency FT Coin (FT).

Encashed crypto-currency FT will be distributed in proportion to sums, submitted by investors during the ICO.

### **Distribution of funds**

Crypto-currency FT ICO fund-raising will be allocated for:

1. 90% of funds will be allocated for investment in active ecosystem created during the 1<sup>st</sup> stage for immediately fulfillment of the obligation to ensure declared yield of not less

than 12% for the whole 100% of tokens FTT and crypto-currency FT bought by investors.

2. 10% of funds will be allocated for:

- Project scaling in the over-the-counter and exchange markets and solving task to ensure planned yield for large sums of investment
- Working out and improving an architectonic, technical and technological solutions of ecosystem
- Improving the arrangement and ways to increase the profitability
- Implementation of a set of measures and solution of the problem, ensuring the fulfillment of the stage.

Owners of the tokens FTT and crypto-currency FT may rely on profit earned as a result of investment and activity of created system with yield of not less than 12% in USD for the whole 100% bought tokens FTT.

Owners of tokens FTT will receive the first payment of profit, earned as a result of investment and activity of created system for the whole 100% bought tokens FTT, before crypto-currency FT ICO.

Owners of tokens FTT will have redemption right preferential conversion into crypto-currency FT.

Structure of initial emission and distribution of crypto-currency FT ICO will be defined during the implementation of goals and objectives of the 1<sup>st</sup> stage.
